5-

The image shows the Swagger UI interface for a web application. The 'Auth' section is expanded, showing the 'POST /api/Auth/register' endpoint. The 'Book' section is also visible. The 'Responses' section for the 'POST /api/Auth/register' endpoint is highlighted with a red box, showing a 404 status and an error message: 'Error: response status is 404'. The response body is also highlighted with a red box, showing a JSON object: { 'statusCode': 404, 'message': 'Kitap listesi bulunamadı.' }.

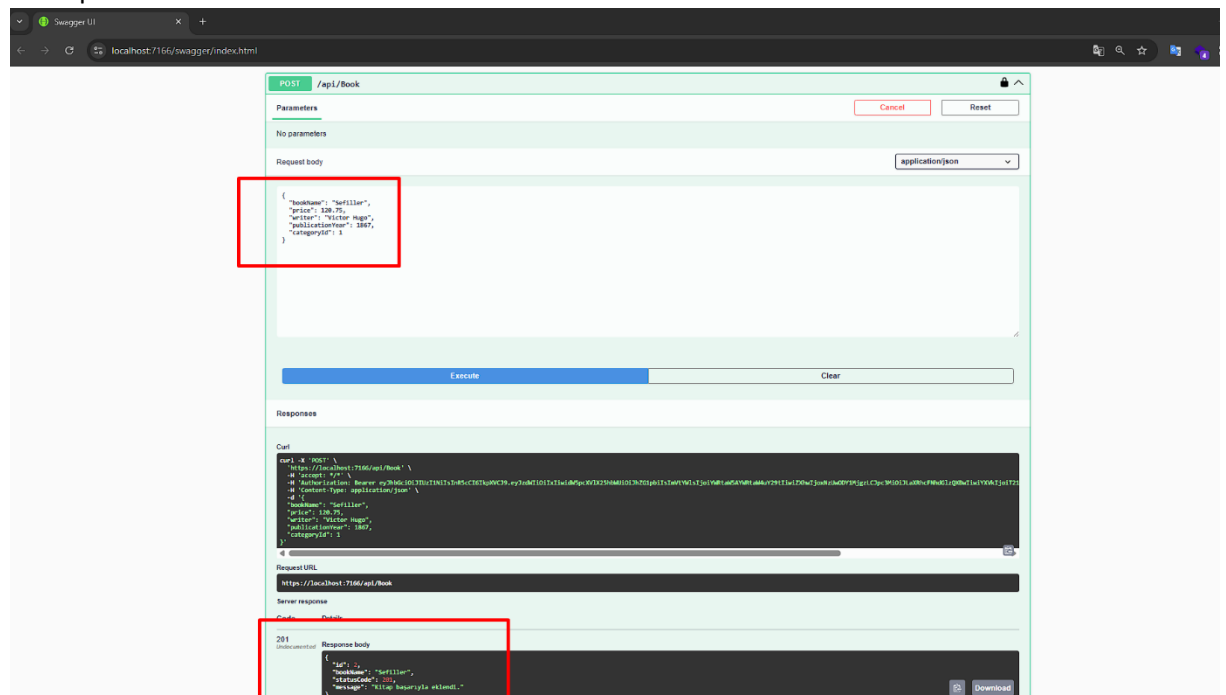

6- Kategori ekleme işlemi

The image shows the Swagger UI interface for a web application. The 'Category' section is expanded, showing the 'POST /api/Category' endpoint. The 'Request body' section is highlighted with a red box, showing a JSON object: { 'categoryName': 'Bili' }. The 'Responses' section for the 'POST /api/Category' endpoint is highlighted with a red box, showing a 201 status and a response body: { 'id': 1, 'categoryName': 'Bili', 'statusCode': 201, 'message': 'Kategori başarıyla eklendi.' }.

11- Kitap bulunamadı hatası global hata yönetimi ile hata görüntüsü

The screenshot shows the Swagger UI interface for a REST API. The selected endpoint is `GET /api/Book/{id}`. The parameter `id` is set to `222`. The response section shows a `404` status with the message `Error response status is 404`. The response body is `{ "statusCode": 404, "message": "Kitap bulunamadı." }`. A red box highlights the response body, and a red arrow points to the text `global hata yönetimi olmayan kitap bilgisi için hata mesajı`.

Swagger UI interface showing a GET request to `/api/Book/{id}` with parameter `id` set to `222`. The response shows a 404 status with the message "Error response status is 404". The response body is `{ "statusCode": 404, "message": "Kitap bulunamadı." }`. A red box highlights the response body, and a red arrow points to the text "global hata yönetimi olmayan kitap bilgisi için hata mesajı".
